

## Success is based on hard work & a Special Female.

2011 was a very successful year for Lillyfield Alpacas; with 4 Supremes, 15 Championships, 9 Reserve Championships, 4 Sires Progeny 1sts & 9 Best Colours. To top it all off one of our favourite boys was selected to be in the National Auction, culminating in “Spades Are Trumps” being sold for the highest price at the auction – sold to New Zealand.

This success was based in our opinion on having some fabulous “Stud Females” such as the dam of Spades are Trumps; **Lillyfield Matilda**. Matilda’s pedigree reads like a who’s who itself with Ledgers Dream, Inti & Shanbrooke High Society.

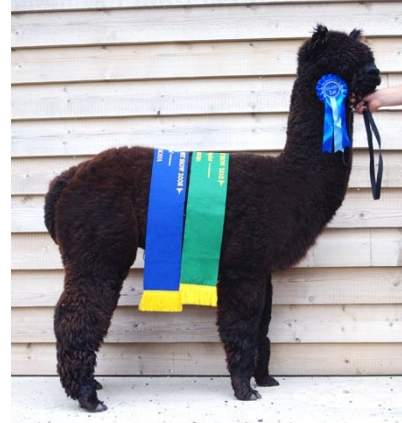

Matilda was a Champion in her own right through all ages groups from Junior to Senior Female, as a nearly 10 year old her fleece statistics are still a remarkable 21 micron with 4 sd. She is a fabulous dam with good milk capacity and easier birther – just what we all need.

Her progeny to date are also outstanding;

**Lillyfield Kedaar** (Sire Blue Grass Bollinger) won a number of Reserve Championships then was sold very early in her show career to the UK, where she went on to win numerous awards.

**Lillyfield Jack of Spades** (Sire Blue Grass Bollinger) a stunning true to type black male with exceptional coverage and bone – he was awarded a number of Reserve Championships in Australia prior to being sold to the UK where he has gone on to be a highly influential black sire in the UK industry.

**Lillyfield Azamour** (Sire Forestview Prince of Thieves) is a super dense young female carrying the same micron characteristics of her dam – still 21 micron & 4sd. Azamour has been awarded numerous first places and Reserve Championships in her show career.

**Lillyfield Spades Are Trumps** (Sire Blue Grass Bollinger) a replication of his full sibling Jack of Spades with a superb show career of 4 Best Black awards, 3 Reserve Championships and ultimately to go on to be sold for the Highest Price at the recent National Auction 2011.

**Lillyfield Up the Ante** (Sire Blue Grass Bollinger) is a true reflection of his dam with a high frequency crimp and fabulous presence – this young male has just begun his stud work after a highly successful show career – we expect great things from him in the future.

When you see a stud doing well in the show ring and sales, don't put it all down to Sires – give due consideration to the Dams of the stud and the quality they bring to the breeding program, females the like of Matilda are gems in a sea of stones, they produce well to a number of males and continue to do so throughout their productive lives.
